Project Name -> CRACK WITH SENIOR

About crack with senior:-

It is simple Website with front & backend;

The project is about how junior/fresher know about the senior in our college & which branch he/her study.

Website contain

The portfolio of senior who get a good company from campus placement

And also some contact details of senior are also available in website.

The students(currently in campus) data also available so anyone can search which student is in which branch and year wise list of students (semester also added).

The website gave a security so unauthorized user don't access students sensitive information such as contact detail ,college details and many more.
