Project Title :-

WEB-MALL

Project Glimpse :-

During the COVID-Lockdown, the giant Malls were closed which and the people who used to be dependent on Malls for either shopping or any job had a difficult time. Our project will bring the shops of a Mall on Internet.

Project Description :-

The WEB-MALL's shop will keep the Database of different products. It will have different showrooms listed on it, with a feature of movie ticket booking and salon appointment.

Target Features :-

The WEB-MALL will feature different shops, multiplex tickets and salon appointment booking. The user can also use it to find whether a particular product is available and the amount of it present sitting at home with no human contact, from the shops section. And from the multiplex they can see which movie is on screen and the seat availability.

Advantages :-

The people who lost job due to closed of malls they will have job either at store or as a delivery boy/girl. The costumers need not to visit the crowded malls. As after shopping from amazon/flipkart the product is delivered in at least 3-4 days, which will be reduced to same day or next day. The shopping can be done 24x7. The movie theatres pay lot of money to sites like Paytm, but this service will be cheaper and more in there control.

Future Scope :-

We will try to get the people's interest, to allocate the number of screens to a movie. Also, they can order food items online. After opening of lockdown also the services will be easily available.

Limitations :-

The city with no Mall can't be using it. The customers will have to visit Mall for movie and Salon purposes.
