**Project Title :- QuickSale**

**Project Glimpse :-**

Deals with selling and purchase of old electronic appliances and devices. Ensures each user on platform is authenticated and provides good filters and design for product searching.

**Project Description :-**

- This E-Commerce site will follow C2B2C business model.
- This project allows to authenticate users and allow them to buy/sell products.
- Firstly, Seller will post all the details of the old products. According to entered product details, best sell price will show to the seller.
- If seller agree with the sell price, he will submit/post the sell advertise.
- Then after ad posted, quick sale will add extra fee (logistics, QuickSale commission, govt tax, etc) on the product.
- Finally, the product will live on buyer page.

- If buyer place an order, then the product will pick-up from seller.
- After verifying the product, will shipped to the buyer address.

## Target Features :-

- Product menu with intuitive design
- User, product category and product page.
- Search Filters for product.
- Backend to store user details, product details and images.

## Advantages :-

- Ease to understand.
- User friendly layout.
- Easy to sell and easy to buy.

## Future Scope :-

- Include industry practices to verify and check product authenticity in future.
- Can use ML based techniques to detect fraudulent users and provide personalised feed.
- Scope for improved ad environment and special pages to support product launch.

## Limitations :-

- Product quality assurance.
- Handle combined product sale as a single unit.
