Project Title: QuickSale

Project Glimpse: -

This E-Commerce follows C2B business model. Through this site any person can sell his/ her old devices like smartphones, tablets, laptops, accessories and other electronic gadgets quickly.

Project Description:

There are so many websites works as mediator between buyers and sellers, like Quiqr etc. But it takes a lot of time to match the buyer with the seller. But in this site the seller will fill all info about the goods, based on the information by the seller our algorithm will show a best price of the old goods/device. If the seller is satisfied with this price, he/ she will confirm the order for selling.

Target Features: -

"QuickSale" will collect all such goods mentioned above. after that, these goods are repaired with new parts(replaced) and will look new. Then it will be ready for re-sale as refurbished item through other B2C ecommerce site.

Advantages: -

1. Poor people can afford the devices/ goods with a minimal affordable price with a min of 6-month warranty.

2. It will improve the society to stay updated with the new one launched (who sales their items)

Future Scope: -

1. There may be no such ecommerce sites provide these facilities like "QuickSale".

2. This model has low competition in this market.

3. It may create monopoly in this business model

4. This business model has potential to grow continuously.

Limitations: -

1. It will hard sell the goods with the speed like the speed of receiving devices/goods through "QuickSale".

2. Price may or mayn't satisfy sellers expectation.
